-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-13 rejected under 35 U.S.C. 103(a) as being unpatentable over Shohi et al. US 6,383,674.

4. This patent describes plasticized poly(vinyl acetal) that can be the polyvinylbutyral as claimed, see column 3 lines 2+. The salt combination as claimed is taught at column 4 lines 37+ and shown in the examples. The amounts used and suggested are the same as those claimed. The difference between the claimed invention and that described in the patent is the claimed ratio is not expressly described within the patent. One of ordinary skill would have been motivated to use the salt in the ratio as claimed. The claimed ratio is very broad and reads on equal amounts of each salt as well as using either salt in significant excess relative to the other salt. The

knowledge generally available to one of ordinary skill in the art leads one to use equal amounts of each salt as well as using either salt in significant excess relative to the other salt. The alleged unexpected results in the specification have been fully considered but fail to rebut the prima facie case of obviousness. The results are not commensurate in scope with the claimed invention and fail to compare the claimed invention with the closest prior art.
